

WHAT IS CLAIMED IS:

1. A drawer, comprising:

a thermoplastic layer; and

a heat transfer layer mounted on an outer surface of the thermoplastic

5 layer.

2. The drawer in accordance with claim 1, wherein the heat transfer layer is combined with the outer surface of the thermoplastic layer integrally.

3. The drawer in accordance with claim 1, further comprising a bottom plate, and a plurality of side plates surrounding the bottom plate to form a receiving space, wherein the thermoplastic layer is mounted on the bottom plate and the side plates.

4. The drawer in accordance with claim 3, wherein the bottom plate is integrally formed with the thermoplastic layer.

5. The drawer in accordance with claim 3, wherein the side plates are integrally formed with the thermoplastic layer.

6. The drawer in accordance with claim 3, wherein the thermoplastic layer forms an outer surface of the bottom plate and the side plates of the drawer.

7. The drawer in accordance with claim 1, wherein the thermoplastic layer forms a micro-pore structure.

8. The drawer in accordance with claim 1, wherein the heat transfer layer is heat press transferred onto the thermoplastic layer.

9. The drawer in accordance with claim 1, wherein the heat transfer layer has a surface provided with plurality of patterns.

10. The drawer in accordance with claim 1, wherein the heat transfer layer is printed on a film made of heat resistant material.
